

LMS90-062-DLP_rev1.0: AI Fluency, Learning Pathway

ABOUT THIS LEARNING JOURNEY - AI FLUENCY:

Welcome to the **AI Fluency** learning journey. We trust that you will be successful with your studies and that this pathway will help introduce you to the world of Artificial Intelligence. We hope that you find the course materials not only informative and insightful, but also enjoyable.

Please see your learning pathway below.

The AI fluency content is designed to educate individuals on the fundamentals of AI, empowering them to integrate this powerful technology into their everyday lives. It includes 44 bite-sized videos covering a wide range of AI topics, from its history and basic principles to ethical considerations and global initiatives. A complete section on getting started with Copilot is also part of the content, aimed at teaching individuals to navigate this new technology with ease.

LEARNING PATH: Complete all items in the Learning Path to complete the learning journey.

COURSE DURATION: 5 HOURS 38 MINUTES * 6 courses: 3 hours (44 videos) * 6 mini assessments: 38 minutes * 6 additional knowledge checks: 60 minutes * 1 final assessment: 60 minutes

HOW TO COMPLETE THIS COURSE: Work through the courseware provided. Watch all the content and score a minimum of 80% on the assessments as well as the final assessment to complete the course.

EARN A DIGITAL CERTIFICATE WHEN YOU ACHIEVE COMPLETION: In collaboration with Microsoft, leading global providers of innovative learning, you have the opportunity to earn a digital certificate upon successful completion of this content.

COURSE CONTENTS	DESCRIPTION
Explore AI Basics THEORY AND VIDEOS: 53m	This course introduces the fundamental concepts of AI, providing an overview of its history, various types, applications, and the distinctions between AI terminologies.
Explore AI Basics MODULE ASSESSMENTS: 15m	Assess your understanding of this module.
Explore Generative AI THEORY AND VIDEOS: 32m	This course dives into the intricacies of generative AI, demonstrating how it works, and explaining common relatable terms.
Explore Generative AI MODULE ASSESSMENTS: 15m	Assess your understanding of this module.
Explore Internet Search and Beyond THEORY AND VIDEOS: 43m	This course explores the mechanics of Internet search engines, discussing advanced search techniques and the future of search technology. It also highlights how recent developments in AI are reshaping the way we search for information.
Explore Internet Search and Beyond MODULE ASSESSMENTS: 15m	Assess your understanding of this module.

COURSE CONTENTS	DESCRIPTION
Explore Responsible AI THEORY AND VIDEOS: 27m	This course discusses the ethical and responsible use of AI technologies, considering aspects such as fairness, transparency, privacy, and accountability. It also covers current issues and strategies that companies are implementing to combat security threats.
Explore Responsible AI MODULE ASSESSMENTS: 17m	Assess your understanding of this module.
Boost Your Productivity with Copilot THEORY AND VIDEOS: Part A: 31m Part B: 45m	This course provides a guide on how to get started with Copilot, an AI companion. It includes real-life examples of how Copilot can enhance productivity by assisting with tasks such as planning, writing, and more, thereby making work more efficient and effective.
Boost Your Productivity with Copilot MODULE ASSESSMENTS: 20m	Assess your understanding of this module.
Explore AI For All THEORY AND VIDEOS: 19m	This course discusses how AI is making a global impact, transforming job roles, and leading to greater accessibility. It also highlights how AI is fostering a more inclusive society by breaking down barriers for learners.
Explore AI For All MODULE ASSESSMENTS: 16m	Assess your understanding of this module.
FINAL ASSESSMENT: 60m	This course contains a final assessment to test your knowledge and skills gained throughout this course.
